Introduction

Under the European Union’s Markets in Financial Instruments Directive and associated regulations (“MiFID II/MiFIR”), investment firms executing client orders are required to summarise and make public, on an annual basis, for each class of financial instrument, the top five execution venues in terms of trading volumes where they execute client orders in the preceding year, alongside information on the quality of execution obtained. Such information should then enable investors and the wider public to evaluate the quality of an investment firm’s execution practices.

This document consolidates the required disclosures, covering the trading activity of BlueBay Asset Management LLP and BlueBay Asset Management LLC (collectively “BlueBay”) for the period of 1 January 2018 to 31 December 2018, for the following classes of financial instruments:

- Equity – Shares and Depositary Receipts
 - Tick size liquidity bands 5 and 6 (from 2,000 trades per day);
 - Tick size liquidity bands 3 and 4 (from 80 to 1,999 trades per day); and
 - Tick size liquidity bands 1 and 2 (from 0 to 79 trades per day)
- Debt instruments
 - Bonds
- Interest rate derivatives
 - Futures and options admitted to trading on a trading venue;
 - Swaps, forwards, and other interest rates derivatives
- Credit derivatives
 - Other credit derivatives
- Currency derivatives
 - Swaps, forwards, and other currency derivatives
- Structured finance instruments
- Equity derivatives
 - Options and Futures admitted to trading on a trading venue;
 - Swaps and other equity derivatives
- Securitised Derivatives
 - Warrants and Certificate Derivatives
- Securities Financing Transactions (SFTs)
 - Bonds

Top 5 execution venue reports in the remaining classes of financial instrument are not included, due to having not been traded by BlueBay during the year.

Explanatory Statement

BlueBay has in place an Order Execution Policy (“the Policy”), which is available [here](#). The Policy is reviewed and updated at least annually. The Policy applies equally to each of BlueBay’s clients, all of whom have been categorised as Professional. The Policy is one element of BlueBay’s overall framework for the delivery of best execution to its clients. BlueBay’s best execution framework is detailed below:

- **Order Execution Policy:** BlueBay’s overarching policy framework for achieving best execution;
- **Procedures:** Desk-based guides detailing methods for achieving best execution, on a per financial instrument class basis;
- **Training:** Both conflicts of interest training, and one-to-one training between each Execution Trader and Compliance on the regulatory requirements surrounding best execution;
- **Monitoring/Surveillance:** T+1 exception-based review of Transaction Cost Analysis (TCA) data, as well as periodic reviews of best execution factors (e.g. gifts and entertainment, settlement performance, etc.);
- **Testing:** Point-in-time review of BlueBay’s best execution framework, or elements of it (e.g. counterparty order execution policy reviews);
- **Trade Execution Oversight Committee (TEOC):** Forum for the analysis, review and challenge of BlueBay’s execution framework and reporting;
- **Reporting:** Internal, client and regulatory reporting, as required by policy, contract or regulation.
- **Disclosure:** Investment Management Agreement, Prospectus, Form ADV, top five execution venue reporting and qualitative assessment (RTS 28).

BlueBay’s Trade Execution Oversight Committee (“TEOC”, or “the Committee”) assumes ownership of BlueBay’s order execution policies and arrangements, while monitoring and overseeing trading practices and making recommendations, where appropriate, to improve trading practices.

BlueBay uses an independent transaction cost analysis (“TCA”) provider to assist with its detailed monitoring of the quality of execution obtained by its traders. However, it is important to note that TCA is only one of a number of factors that BlueBay uses to assess best execution.

Consolidated Qualitative Statements

As part of the qualitative assessment of best execution, BlueBay is required to provide commentary in several non-instrument specific areas, which have been detailed below, rather than on a per class of financial instrument basis:

CLOSE LINKS

BlueBay is a subsidiary of the Royal Bank of Canada (RBC), a global financial services company with a number of affiliated entities. RBC group entities may have both direct, and indirect, interests in the financial instruments and markets in which BlueBay invests for its clients and may effect transactions with those clients. RBC group entities may act in a variety of roles, including those of proprietary trader, broker, underwriter, agent or lender in connection with transactions in which BlueBay's clients have an interest, and will receive remuneration or other benefits in connection with these roles.

BlueBay's Order Execution Policy requires that trades with RBC group entities are executed on an arm's length basis and that BlueBay obtains the best possible result, taking into account price, costs, speed, likelihood of execution and settlement, size, nature of the order, or any relevant consideration.

CLIENT CATEGORISATION

BlueBay does not trade on behalf of retail clients. BlueBay does not treat clients differently depending on client categorisation. All execution decisions are made by BlueBay's execution traders in accordance with BlueBay's Order Execution Policy.

SPECIFIC ARRANGEMENTS

BlueBay does not receive payments, discounts, rebates or non-monetary benefits in its trading arrangements.

CONSOLIDATED TAPE USAGE

Consolidated tapes were not provided for any class of financial instrument class presented during the 2018 calendar year. Should a consolidated tape become available in any applicable class of financial instrument, BlueBay will assess the utility of such a tape and, where it enables BlueBay to effectively determine and benchmark the quality of price received by execution counterparties, will utilise this information.

Qualitative Assessment	
Execution Factors	Trading in equities forms a small percentage of BlueBay’s overall trading activity. For outright equity trades, explicit costs (such as commission costs) was generally the primary execution factor. For trades in securities in less liquid regional markets, trading has generally focused on utilising domestic brokers, with superior knowledge of local markets, to help achieve best execution. When executing convertible bond orders on swap, the choice of equity counterparty was typically driven by the choice of executing broker on the bond.
Change in Execution Venues	There have been no changes to trading venues listed in the Order Execution Policy throughout 2018.
Data and Tool Usage	BlueBay utilises proprietary data, vendor-based data and TCA systems, as well as data provided by trading venues to undertake analysis of execution and assess the effectiveness of BlueBay’s execution framework.

Debt instruments

Class of Instrument		Debt Instruments

Merrill Lynch International GGDZP1UYGU9STUHRDP48	5.82%	5.33%	N/A	N/A	0%

Qualitative Assessment

Execution Factors	Typically, two primary execution factors are expected to dominate in the trading of bonds: price and size. Price is by far the most common factor when judged on number of trades as often we will look to utilise a Request for Quote protocol for trades at, or below, “normal” market size. Our preference is to request these quotes, where possible, on a multilateral trading facility such as Bloomberg, Tradeweb or MarketAxess, with several dealers in competition at the same time. Size is typically the second most common execution factor for bond trading as we often handle above “market size” orders, and our priority is to execute within suitable price context but with a preference to trade larger block sizes, often with a single dealer to prevent information leakage and utilising the risk/balance sheet of our counterparties.
Change in Execution Venues	There have been no changes to trading venues listed in the Order Execution Policy throughout 2018.
Data and Tool Usage	BlueBay utilises proprietary data, vendor-based data and TCA systems, as well as data provided by trading venues to undertake analysis of execution and assess the effectiveness of BlueBay’s execution framework.

Goldman Sachs International W22LROWP2IHZNBB6K528	5.58%	6.17%	N/A	N/A	0%

Qualitative Assessment

Execution Factors	<p>For futures, BlueBay do not participate in Direct Market Access. Rather, our orders are passed through several bank counterparties. Execution costs are not a primary factor, given that we have in place a flat fee structure for all banks facilitating this process. The primary execution factor for futures is typically speed, due to the common nature of our futures orders being risk hedging against other assets. Where we trade larger strategic orders, then more priority is given to price with respect to minimising impact on market. In such situations, speed is not a factor.</p> <p>For Swaps, BlueBay will often priority size as the primary execution factor when trading Interest Rate Swaps, given that the majority of such trades are done at a block level with permitted counterparties as strategic trades, and hence information leakage becomes a concern. Request for Market rather than Request for Quote is another approach we utilise to preserve information leakage on such transactions. Appropriate documentation such as ISDAs can play a part in some situations, such as bilateral settlement and hence impact broker selection.</p>
Change in Execution Venues	<p>There have been no changes to trading venues listed in the Order Execution Policy throughout 2018.</p>
Data and Tool Usage	<p>BlueBay utilises proprietary data, vendor-based data and TCA systems, as well as data provided by trading venues to undertake analysis of execution and assess the effectiveness of BlueBay’s execution framework.</p>

Credit Derivatives

Class of Instrument	Credit derivatives				
	Other credit derivatives				
Notification if < 1 average trade per business day in the previous year	N				
Top 5 execution venues ranked in terms of trading volumes (descending order)	Proportion of volume traded as a percentage of total in that class	Proportion of orders executed as percentage of total in that class	Percentage of passive orders	Percentage of aggressive orders	Percentage of directed orders
Barclays Bank plc G5GSEF7VJP5I7OUK5573	21.14%	25.19%	N/A	N/A	0%
Deutsche Bank Aktiengesellschaft 7LTWFZYICNSX8D621K86	14.88%	8.25%	N/A	N/A	0%
BNP Paribas R0MUWSFPU8MPRO8K5P83	14.03%	15.79%	N/A	N/A	0%
Citigroup Global Markets Limited XKZZ2JZF41MRHTR1V493	13.84%	15.00%	N/A	N/A	0%
JPMorgan Chase Bank, National Association 7H6GLXDRUGQFU57RNE97	12.88%	8.23%	N/A	N/A	0%

Qualitative Assessment	
Execution Factors	For normal market size trades, BlueBay will prioritise price as an execution factor, typically requesting multiple quotes on MTF venues. For above normal market size, BlueBay will typically prioritise size and limit information leakage. Appropriate documentation such as ISDAs can play a part in some situations such as bilateral settlement, and hence impact broker selection.
Change in Execution Venues	There have been no changes to trading venues listed in the Order Execution Policy throughout 2018.
Data and Tool Usage	BlueBay utilises proprietary data, vendor-based data and TCA systems, as well as data provided by trading venues to undertake analysis of execution and assess the effectiveness of BlueBay's execution framework.

Currency Derivatives

Currency derivatives

Deutsche Bank Aktiengesellschaft 7LTFWFZYICNSX8D621K86	0.49%	0.53%	N/A	N/A	0%

Qualitative Assessment	
Execution Factors	For structured credit sales, BlueBay most frequently sells via a BWIC (bids wanted in competition) process. BlueBay circulate a list widely to all our trading counterparties, as we feel this gives us quick and best execution. For purchases, BlueBay receive offer sheets from all dealers, and select counterparties based on which one has the bond we want to buy at the best level.
Change in Execution Venues	There have been no changes to trading venues listed in the Order Execution Policy throughout 2018.
Data and Tool Usage	BlueBay utilises proprietary data, vendor-based data and TCA systems, as well as data provided by trading venues to undertake analysis of execution and assess the effectiveness of BlueBay's execution framework.

Qualitative Assessment

Execution Factors	Speed is the primary execution factor for the majority of trades admitted to trading venue, given our trades are typically normal market size.
Change in Execution Venues	There have been no changes to trading venues listed in the Order Execution Policy throughout 2018.
Data and Tool Usage	BlueBay utilises proprietary data, vendor-based data and TCA systems, as well as data provided by trading venues to undertake analysis of execution and assess the effectiveness of BlueBay's execution framework.

Securitised Derivatives

Class of Instrument	Securitised Derivatives				
	Warrants and Certificate Derivatives				
Notification if < 1 average trade per business day in the previous year	Y				
Top 5 execution venues ranked in terms of trading volumes (descending order)	Proportion of volume traded as a percentage of total in that class	Proportion of orders executed as percentage of total in that class	Percentage of passive orders	Percentage of aggressive orders	Percentage of directed orders
Societa' Per Amministrazioni Fiduciarie Spafid Societa Per Azioni 815600D9C7C60F88D315	100%	100%	N/A	N/A	0%

Qualitative Assessment

Overall, trading undertaken in this class of financial instrument comprises a negligible proportion of total trading volume, and is seldom undertaken.

Execution Factors

Warrants are generally obtained either via participation in a challenging refinancing, where warrants are attached to the debt to provide additional financial incentive or awarded during an administration/restructuring process where creditors have taken control.

Change in Execution Venues

There have been no changes to trading venues listed in the Order Execution Policy throughout 2018.

Data and Tool Usage

BlueBay utilises proprietary data, vendor-based data and TCA systems, as well as data provided by trading venues to undertake analysis of execution and assess the effectiveness of BlueBay's execution framework.

Barclays Bank plc G5GSEF7VJPSI7OUK5573	6.86%	18.96%

Qualitative Assessment

Trading in Securities Financing Transactions extends primarily to repos and reverse repos. Typically, two or three execution factors take precedent when trading repos. Price is generally the predominant factor when covering shorts; however, this is always considered relative to the size being offered, and sometimes the likelihood of settlement will be the prevailing factor.

Execution Factors

For cash financing, price and haircut are generally the predominating factors. At times, trading may take place at a higher price if the haircut is more favourable. The likelihood of settlement be more a consideration when trading at shorter settlement cycles than market convention.

Change in Execution Venues

There have been no changes to trading venues listed in the Order Execution Policy throughout 2018.

Data and Tool Usage

BlueBay utilises proprietary data, vendor-based data and TCA systems, as well as data provided by trading venues to undertake analysis of execution and assess the effectiveness of BlueBay's execution framework.

Other

Please note that the above table may be impacted by the presence of closing legs of transactions, and administrative closing and reopening trades.

Issued in the United Kingdom (UK) by BlueBay Asset Management LLP (BlueBay), which is authorised and regulated by the UK Financial Conduct Authority (FCA). BlueBay is also registered with the US Securities and Exchange Commission (SEC) and is a member of the National Futures Association (NFA) as authorised by the US Commodity Futures Trading Commission (CFTC).
